IPS 4.0

IPS 4.0 is a one-stop planning, estimating and forecasting tool that can take a project from conception through execution all the way to completion, while saving both time and money.

ATOM

ATOM 3.0 is our contractor cost control software and is a precise and automatic method for tracking employee/ contractor labor hours along with equipment rental and material cost for any project.

STO

STO is an automated milestone viewer that captures your preparation milestones into a schedule then monitors compliance. This tool also provides a central depository for the preparation deliverables where everyone can view and add information.

IPS 4.0 UPDATE

IPS 4.0 CORNERS MARKET

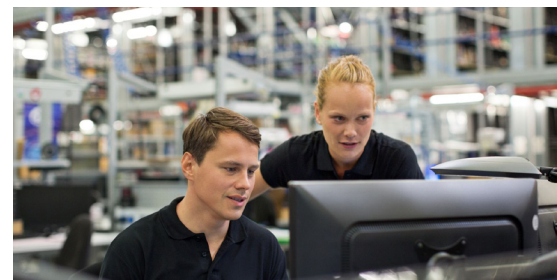

IPS 4.0 has cornered the market, obtaining 33% of the petrochemical industry. Dedicated to the art of success, we use the latest software to better plan company events. Toadfly treats clients like family, sharing in the resulted success of the business partnership. We explore creative ways to bridge the gaps in your current software to customize our solution to best meet your needs. We thrive on resolving tough challenges and look forward to being given the opportunity to prove our capabilities.

Our state-of-the-art software and award-winning IT support are the two key factors to our success. As a team, we developed an affordable, front-line planning, scheduling and cost-monitoring software that will reduce manpower and overall cost for your events. In fact, the savings we will find for you will likely pay for our service after just one event!

Our team is ready to help your organization move to the next level of success.

We will come to you and assess the best way to reach your goals.

The software has been updated and we are ready to advance you into the future and the front of the line in your industry. Don't be left behind and let your competition move forward without you.

TOADFLY TRAINING

TOADFLY REVAMPS ITS TRAINING COURSES

Toadfly has revamped its Planning, Scheduling, and Cost Control training programs. Using the IPS 4.0 software, the new curriculum teaches multiple levels of awareness, focusing on the aspects that have the greatest effect on your bottom line. We also ensure fluency with the IPS software, itself, which can be used to run studies on your current employees and processes to highlight areas for improvement and maximize production.

We host 2-5 day courses for both experienced and green individuals. Whether we come to you, use a third-party location or welcome you into our state-of-the-art facility, we offer training that suits your needs. We even offer courses online!

“Toadfly transitions from ‘just a software company’ to a ‘leader in their division’.”

Toadfly Partners with local training institutes to Complete Training Courses for the Youth of Houston

Toadfly has partnered with local training institute, to train the next generation how to estimate, plan, schedule and adjust for cost during a live event.

In a real-world setting, we cover everything from acquiring authorization for an event to building the scope and developing an accurate estimate to mirror actual AFE phases. Working in teams to sharpen skills used in every day situations, they will learn how to execute an event. They begin in the construction phase and work their way through the schedule while monitoring cost until the event has been completed successfully. We strive for excellence and only when it's reached will training certificates be awarded.

Our experienced, certified instructors focus on training in a way that ensures full comprehension of the skills required to perform outage or turnaround events, providing a clear path to a successful career.

OFFSITE PLANNING

TAKE YOUR WORK HOME

Our software allows for onsite or remote access, providing options for use during these unprecedented and uncertain times. Workers can perform their planning and scheduling tasks from the safety of their home while potentially increasing productivity and lowering your cost!

Because we tailor our software to our clients, we're able to easily transition from the "normal" on site work day to the "new normal" virtual office!
