

ATOM

TIMEKEEPING AND COST MANAGEMENT

Get real-time reporting along with historical views of employee and contractor attendance.

Toadfly ATOM is a precise automatic web-based system that tracks employee/contractor labor hours using event data from your existing database. No need for manual data entry, chasing down missing timecards, or waiting for labor costs. Timesheets are automatically sent by ATOM to the appropriate individuals for revision and approval, thus eliminating the delay in their receipt and impact on payroll. ATOM allows any approved employee to access the system to check real-time costs and hours. ATOM is configured with HID brand of attendance card readers but can also be integrated with any other card reading systems.
