

MONITOR, COMMUNICATE AND CONTROL SCOPE CHANGE THROUGH ELECTRONIC ROUTING

See the impact of electronic change requests as they happen.

Toadfly Electronic Change Request software automates scope change management by electronically routing the requests throughout the planning and approval or rejection process. This rapid-fire system gives your leadership team time to see the full impact of a change in scope and all the details necessary to make the correct decisions.

Keep your team ahead of surprises.

ECR integrates seamlessly with IPS. Immediately see the result of a change request in your cost forecast. Trigger the creation of an electronic change request based on IPS scope freeze settings to help your organization enforce industry standard scope control procedures.

Project-specific Structure

Roles and responsibilities change based on an events size and complexity. Our software allows you to tailor your list of project users and assign specific roles and delegation of authority levels at a location level as well as at the project level.

Reporting

The ECR module offers dozens of pre-formatted detailed and summary-level reports and user-customizable reports. See the lifecycle status of the ECR, the count, and trend information in one dashboard view.

Uncontrolled scope growth poses one of the most significant risks to any successful turnaround. Toadfly ECR software gives you an industry-leading tool to identify, analyze, and control scope growth to help you stay on time and on budget.

The strength of our software comes from its ability to be tailored to your exact needs and specifications. We provide our customers with more efficient analytical tools that streamline their processes, reduce costs, and add value to their bottom line.
