Centralized Employee Tracking

Centralized Employee Scheduling
You can schedule employees on current or future projects with our drag-and-drop feature that cross-checks all required training for that specific client and job.

Employee Document Management
Upload and attach an employee's SSN, DL, TWIC card, Utility bill, and other important documents to each employee profile.

Dashboard
EChart displays all ongoing and upcoming projects, a crew list on each job, and all active employees separated by their crafts with its user-friendly dashboard.

Bulk Text and Mailing
Instantly sends text messages and emails through our secure web-based application — individually, by shift, by job or to all employees in the company to ensure they are receiving the latest information.

Per Diem Management
Preset Per Diem qualifications to automatically grant your employee qualified Per Diem on a job-to-job basis. Integrate with Google Maps to automatically print driving directions from your employee's address to the client's.

Employee Details
Have full access to each employee's current trainings, expired trainings, complete job history, call confirmation log, and all personal documents anytime-anywhere.

Labor Requests
Schedule and staff each project in one centralized location.

Alerts
Receive monthly notification of all expiring trainings and soon-to-expire trainings to assure your employees complete required trainings before their next job.

Training
Never send an unqualified worker on the job site ever again. EChart will cross-check all client-specific training, site-specific training, and job-specific training to ensure each employee is valid on the start date and for the project's duration.

DISA Integrated
EChart has a direct connection with DISA's server, which will tell you if your employee is active or inactive in DISA's database with the click of a button.

24/7 Access
Eliminate installing software onto your computer. All our applications are cloud-based, giving you full access 24/7 on any smart device.

The strength of our software comes from its ability to be tailored to your exact needs and specifications. We provide our customers with more efficient analytical tools that streamline their processes, reduce costs, and add value to their bottom line.

Contact Toadfly today for a free customized demo of Toadfly EChart and our full suite of products and services that increase your productivity and profitability.
